

SAINT JAMES MARINE

Personal Executive Profile

Michael J. Saint James is a senior energy and infrastructure leader with more than four decades of global experience spanning offshore wind, transmission-adjacent infrastructure, and large-scale capital projects.

Known for operating as a senior regional reference point, aligning global strategy with local execution realities, strengthening stakeholder confidence, and reducing delivery risk in highly regulated environments.

Career engagements include grid-connected offshore wind, export systems, ports and logistics interfaces, and transmission-linked infrastructure, working closely with developers, utilities, EPC contractors, regulators, OEMs, and institutional stakeholders.

Role Focus: Regional business and execution enablement; stakeholder and regulatory interface stabilisation; market entry and organisational readiness; executive and board-level advisory.
